Very Simple: Outdoor

About

Very Simple: Kitchen is an Italian furniture brand that through products and experiences, designed and manufactured with an innovative vision of the industry, offers modular solutions for contemporary lifestyles.
The brand was born from a reinterpretation of the modular kitchen concept, reducing its unnecessary complexity and introducing a simple approach based on independent modules made in Italy from recycled steel.
The kitchens are iconic and representative both of the brand and its community: simple, colorful and modular, designed with an innovative, sustainable and customizable approach. Our products are a combination of industrial style and simple forms with careful attention paid to the use of colors, materials and finishings.

Outdoor collection

Very simple: Kitchen launched its first outdoor collection in 2022 with the aim of expanding into other domestic spaces. 100% stainless steel and also available in standard colours, our kitchens adapt to any outdoor environment thanks to their flexibility. The system consists of lightweight modules that can be joined together to create a unique and fully customisable kitchen design.

We Produce: Simple, Colorful, Modular Kitchens.
