

Very Simple: Outdoor

Very Simple: Kitchen

About

Very Simple: Kitchen rethinks the classic kitchen by stripping away all unnecessary complexity. Built on a philosophy of pure simplicity, the brand brings this vision to life through a system of independent modules, crafted in Italy from recycled and stainless steel. With its innovative vision, Very Simple: Kitchen creates more than just products, it creates experiences for the modern life. Each element is a blank canvas, fully customizable in color and composition to offer unlimited design possibilities. Simple, authentic, and expressive, Very Simple: Kitchen has become an icon for a community that values these principles. The collection merges an industrial aesthetic with clean, timeless forms, showcasing meticulous attention to materials, color, and finish. A promise of enduring quality, built to last.

Outdoor collection

Very Simple: Kitchen first launched its outdoor collection in 2022. This move expanded the brand into other areas of the home. Made entirely of stainless steel and available in standard colors, these kitchens are versatile enough for any outdoor space. The system uses lightweight modules that easily connect together, allowing for a fully customizable and unique kitchen layout.

**We produce:
simple, colorful,
modular kitchens.**
